

IDEAL AP140 PRO

The professional air purifier for pure indoor air – for larger room sizes of 120 to 170 m²*. Novel 360° multi layer filter system with a highly effective HEPA particulate filter.

360° particulate filter

Fine mesh prefilter

High performance turbo mode

Low energy consumption

Night mode

Remote control

Superior sensors for automatic mode

Convenient timer (start & stop)

Recommended for allergy sufferers

Effective against PM10 / PM2.5 and minor

Technical details

Power supply	220-240V, 50/60 Hz
Fan speed levels	5
Power consumption	7 – 180 watts
Noise levels (dB)	25,2 – 60,3
Air throughput	up to 1550 m ³ /h
Dimensions (H x W x D)	725 x 562 x 633 mm
Weight (kg)	51

* With a room height of 2.50 m.

Product description

The AP140 PRO is a professional air purifier with a high performance 360° multi layer filter. Filters pollutants such as dust, particulate matter (PM10, PM2.5 and minor), pollen and acarid allergens, pathogens such as bacteria and mould spore as well as cigarette smoke from the indoor air. In addition to the included 360° particle filter, a high-quality active carbon inlay is available as an option. This filter inlay is effective against chemical vapours, chemical toxins and odours. It can be easily integrated into the 360° particle filter of the AP140 PRO. High-quality control panel provides function modes such as Auto/manual/turbo. In auto mode, AP140 PRO continually monitors the air quality with intelligent sensor technology and auto-matically controls the power. In turbo mode AP140 PRO purifies the indoor air in a short period of time. In addition to the automatic and turbo adjustment, the fan speed can be manually adjusted at 3 levels and furthermore to the separate super quiet night mode. Timer function can be preset to operate whether in „start timer“ mode, or in „stop timer“ mode. AP140 PRO automatically informs you, when to change the 360° filter. On an average, the 360° filter has to be changed after 12 months, depending on the intensity of the usage. Mobile on castors.

HIGH-QUALITY CONTROL PANEL

Control in an intuitive and comfortable way. Functions: on/off, automatic/manual/turbo, timer, night mode.

COLOUR CODES INDICATE THE AIR QUALITY

The current air quality is indicated in a three-colour code via LED. Depending on the air quality, in the automatic mode, the intelligent process controller regulates the cleaning performance and controls the filter.

REMOTE CONTROL

The AP140 PRO can also be controlled easily via remote control. It is magnetic – for practical storage.

360° MULTI LAYER FILTER

The high performance 360° filter consists of a fine mesh prefilter and a highly effective HEPA particulate filter. Due to the circular design, the whole filter surface is optimally utilized. In addition to the included 360° particle filter, a high-quality active carbon inlay is available as an option.

COMPACT POWER PACKAGE

The integrated GreenTech EC motor provides up to 50% lower energy consumption compared with AC solutions. It makes the AP140 PRO one of the most powerful air cleaners in the market – Made in Germany.
